Yale Cardiovascular Research Group
YALE Angiographic Core Laboratory

CONFORM Pivotal Trial
INSTRUCTIONS TO THE SITE

All angiograms should be obtained paying strict attention to the following features:

o   Please acquire all angiograms in DICOM format, at the highest magnification.

o   Please obtain an angiogram for each sequence and label them.

Baseline Angiography:
Baseline LAA angiography is obtained in the working view using standard of care technique to obtain full LAA opacification.

Tug Test
Perform Tug Test in the working view with CINE documentation.

Pre-Release Angiography:
Pre-release angiography is obtained in the working view using standard of care technique to obtain full opacification of the implant face.

Final (Post-Release) CINE:
In the working view obtain a CINE run to document implant position.

o   Please film any complication that may occur during the procedure.

o   Please use Medidata to upload angiograms.
